CONSERVATION PROJEKT	ÖVVÖ Moliwe River
CLUB/ORGANIZATION CAPACITY	GWG 14000 liter
VIVARISTICEXPERIENCE since 1972	From begining I deal with Malawi and Tanganyika cichlids and the livebearers wild and the breeding form. But I am mainly interested in wild species. These species are closest to me But I am interested in West African cichlids and some Asian too.
	Breedingsuccess Some Pelvicachromis species, Xiphophorus wild species, Goodeidae species .Badis bruxelles and many others.
Motive force	 Natural values are important so that the people who follow us can see what (was) the real nature
