CONSERVATION PROJECT

Xiphophorus - Northern Platyfish

CLUB/ORGANIZATION

member of different French clubs as well as the AFV

CAPACITY

I have at the moment 5 free tanks of 120 l. I also have 60 aquariums of different volume for the selective breeding or maintenance of wild types of livebearers.

VIVARISTIC EXPERIENCE

Date (from)

[geographical area, family](#)

I breed guppy and platy varieties as well as wild strain maintained within the AFV.

[breeding success](#)

I had different titles in the selective breeding of guppy, platy, xipho.

Motive force

I want to complete my knowledge of platy and guppies, whether wild type or selection. So what would be better for me than to participate in a group of maintenance of endangered fish in order to better protect them and know them.
